**Revisiting the Elephant in the Room**

**Losing a student is never discussed. No one ever prepares us for such a tragedy. Driver educators may briefly consider that it may happen, but it is not anything a teacher is ready to internalize. We are familiar with the facts, but no one ever puts those facts into perspective. If 2807 teens ages 15-19 died in car crashes in 2023, that means 2807 driver educators were grieving the deaths of their students in 2023. How do we, as driver educators, deal with this grief/loss?**
